HOW THE FUND HAS PERFORMED SINCE 10 April 2013

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up and past performance is not a guide to the future. CIS are traded at ruling prices and can engage in borrowing and script lending. A feeder fund is a portfolio that, apart from assets in liquid form, consists solely of participatory interests in a single portfolio of a collective investment scheme. Fluctuations or movements in the exchange rates may cause the value of underlying international investments to go up or down. A schedule of fees and charges and maximum commissions is available on request from PSG Collective Investments Limited. Commission and incentives may be paid and if so, are included in the overall costs. Forward pricing is used. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate.

Different classes of Participatory Interest can apply to these portfolios and are subject to different fees and charges. Figures quoted are from Source: 2014 Morningstar Inc. All rights reserved as at end of August 2014, for a lump sum using NAV-NAV prices net of fees, includes income and assumes reinvestment of income. PSG Collective Investments Limited is a member of the Association of Savings and Investments South Africa (ASISA) through its holdings company PSG Konsult Limited.

Conflict of Interest Disclosure

The Fund may from time to time invest in a portfolio managed by a related party.
