The benchmark of the PSG Equity Fund changed from the FTSE/JSE All Share Total Return Index to the Composite of 80% FTSE/JSE Capped Swix All Share Net Total Return Index and 20% MSCI Daily Total Return Net World USD Index from 1 June 2022

Investment objective (summary of investment policy)

The PSG Equity Fund's objective is to offer investors long-term capital growth without assuming a greater risk, and earn a higher rate of return than that of the South African Equity Market as presented by the Composite of 80% FTSE/JSE Capped Swix All Share Net Total Return Index and 20% MSCI Daily Total Return Net World USD Index (including income). The investment policy provides for investment in a mix of securities and assets in liquid form and can include listed and unlisted financial instruments (derivatives).

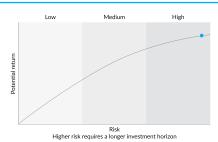

Who should consider investing?

Fund specific risks: The fund sits at the top end of the risk/reward spectrum and investors should be comfortable with fluctuations in shares on stock markets and be prepared to accept the risk of capital loss. The portfolio is concentrated in local and foreign equities and therefore more volatile and exposed to market and currency risks. Property shares may be included in the portfolio and can carry the same risk as investing directly in real estate which is subject to economic and political conditions, interest rates and tax considerations. Investing in foreign securities may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

This fund is suitable for investors who:

- want an equity-focused portfolio that should produce high real returns above inflation and capital appreciation over the long term
- are comfortable with significant stock market fluctuations
 are willing to accept potential capital loss
- have a long-term investment horizon of seven years and longer

Rolling returns (%)

The rolling return chart reflects the highest, lowest and average annualised return over the period indicated since the inception of the fund. For example, for the 1 year period the chart reflects the highest, lowest and average 12 month return the fund has experienced since its inception. Rolling returns highlight the magnitude of an investment's stronger and poorer periods of performance.

The Total Expense Ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over a one and three year period. This percentage of the average Net Asset Value (NAV) of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER ratio does not necessarily imply a poor return, nor does a low TER ratio imply a good return. The current TER cannot be regarded as an indication of future TERs. Part of the Annual Management Fee may be payable to the financial intermediary. The sum of the TER and transaction costs is shown as the Total Investment Charge. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns.

Total investment charge

Total Investment Charge annualised for the period 01/01/2020 to 31/12/2022

Other costs excluding transaction costs % (incl. VAT)	0.02
Transaction costs % (incl. VAT)	0.18
Total investment charge % (incl. VAT)	1.93

Transaction costs

Transaction costs are shown separately and are a necessary cost in administering the Financial Product and impacts Financial Product returns.

Transaction costs should not be considered in isolation as return may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

Fees

A schedule of fees and charges and maximum commissions is available on request from PSG Collective Investments (RF) Limited. Commission and incentives may be paid and, if so, are included in the overall costs. Different classes of participatory interest can apply to these portfolios and are subject to different fees, charges and possibly dividend withholding tax and will thus have differing performances. Adviser fees are negotiated between the client and adviser and is distinct from the other fees on this document.

Disclaimer

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance. Fluctuations or movements in the exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The portfolio may borrow up to 10% of its market value to bridge insufficient liquidity. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds, macroeconomic, political, foreign exchange, tax, settlement and potential imitations on the availability of market information. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate. PSG Collective Investments (RF) Limited does not provide any guarantee either with respect to the capital or the return of the portfolio. Due to rounding, numbers presented throughout this document may not add up precisely to the totals provided.

Performance

All performance data for a lump sum, net of fees, include income and assumes reinvestment of income on a NAV to NAV basis. Annualised performances show longer term performance rescaled over a 12 month period. Individual investor performance may differ as a result to finitial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance is calculated for the portfolio and individual investor performance may differ as a result thereof. The portfolio is valued at 15h00 daily. Income distributions are net of any applicable taxes. Actual annual figures are available to the investor on request. Prices are published daily and available on the website www.psg.co.za/asset-management and in the daily newspapers. Figures quoted are from Morningstar Inc.

Pricing

Forward pricing is used. Unit trust prices are calculated on a net asset value (NAV) basis, which is the market value of all assets in the portfolio including income accruals less permissible deductions divided by the number of units in issue.

The ability of a portfolio to repurchase is dependent upon the liquidity of the securities and cash of the portfolio. To protect investors, a manager may suspend repurchases for a period, subject to regulatory approval, to await liquidity. A suspension ensures that the sale of a large number of units will not force PSG Collective Investments to sell the underlying investments at a price in the

market which could have a negative impact on investors. PSG Collective Investments will keep all investors informed should a situation arise where such suspension is required.

Company details

PSG Collective Investments (RF) Limited is registered as a CIS Manager with the Financial Sector Conduct Authority, and a member of the Association of Savings and Investments South Africa (ASISA) through its holdings company PSG Konsult Limited. The management of the portfolio is delegated to PSG Asset Management (Pty) Ltd, an authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act 2002, FSP no 29524. PSG Asset Management (Pty) Ltd and PSG Collective Investments (RF) Limited are subsidiaries of PSG Konsult Limited. PSG Collective Investments (RF) Limited can be contacted on +27(21) 799 8000; (toll free) 0800 600 168, via email assetmanagement@psg.co.za.

Conflict of interest disclosure

The Fund may from time to time invest in a portfolio managed by a related party

PSG Collective Investments (RF) Limited or the fund manager may negotiate a discount in fees charged by the underlying portfolio. All discounts negotiated are reinvested in the Fund for the benefit of the investors. Neither PSG Collective Investments (RF) Limited nor PSG Asset Management (Pty) Ltd retains any portion of such discount for their own accounts. The fund manager may use the brokerage services of a related party, PSG Securities Ltd.

This is the Minimum Disclosure Document (MDD) for the PSG Equity Fund Class A.

The benchmark of the PSG SA Equity Fund changed from the FTSE/JSE Swix Index to the FTSE/JSE Capped Swix All Share Net Total Return Index from 1 June 2022

Investment objective (summary of investment policy)

The PSG SA Equity Fund's investment objective is to provide long-term capital growth (highest returns above inflation) and outperform the FTSE/JSE Capped Swix All Share Net Total Return Index by investing mainly in South African shares. The investment policy provides for investment in domestic listed securities and assets in liquid form, including shares, participatory interests in listed property shares, loan stock and derivative instruments.

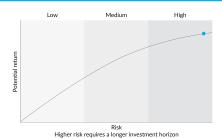

Who should consider investing?

Fund specific risks: The fund sits at the top end of the risk/reward spectrum. Investors should be comfortable with fluctuations in shares on the South African stock market and be prepared to accept the risk of capital loss. The portfolio is concentrated in local equities and therefore more volatile. Property shares may be included in the portfolio and can carry the same risk as investing directly in real estate which is subject to economic and political conditions, interest rates and tax considerations.

This fund is suitable for investors who:

- want exposure to local shares are comfortable with stock market (equity market) fluctuations
- · have a long-term investment horizon of seven years and longer

This is the Minimum Disclosure Document (MDD) for the PSG SA Equity Fund Class F.

The PSG Flexible Fund's objective is to achieve superior medium- to long-term capital growth by investing in selected sectors of the equity, gilt and money markets, both locally and abroad. The fund has a flexible asset allocation mandate and equity exposure will be varied based on opportunity. The fund can invest up to 100% in equities of which up to 45% can be invested in foreign assets and may include listed and unlisted financial instruments (derivatives) in its portfolio. The selected sectors of the equity portion of the portfolio will change from time to time in accordance with changing market conditions and economic trends.

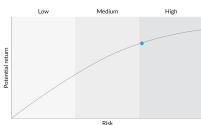

Who should consider investing?

Fund specific risks: The fund sits within the upper half of the risk/reward spectrum. Investors should be comfortable with fluctuations in stock markets and interest rates. The risk of short-term monetary loss is high. The portfolio is exposed to equity as well as default and interest rate risks. Interest rate risk is the risk that the value of fixed income investments tends to decrease when interest rates and/or inflation rises. Default risk is where the issuers of fixed income instruments may not be able to meet interest or capital repayments. Property shares may be included in the portfolio which can carry the same risk as investing directly in real estate and is subject to economic and political conditions, interest rates and tax considerations. Investing in foreign securities may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Changes in the relative values of different currencies may adversely affect the value of investments and any related income. Derivative instruments are included for efficient portfolio management purposes. The use of derivatives could increase overall risk by magnifying the effect of both gains and losses in a portfolio.

This fund is suitable for investors who:

- want exposure to the equity market, but with managed risk levels
- aim to build wealth
- are willing to accept potential capital loss
- have a medium- to long-term investment horizon of five years and longer

Risk/reward profile

Risk Higher risk requires a longer investment horizon

Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns.

Performance fee

The fund's daily net asset value per share (NAV) is compared to the fund's High Water Mark (HWM highest NAV achieved) daily. Where the fund's NAV is greater than the HWM, a performance fee equal to 7% (excl. VAT) of the outperformance is levied. The performance fee is accrued in the unit price daily and collected monthly. No performance fees are charged if the fund NAV is lower than the HWM NAV. The performance fee is uncapped with a since inception High Water Mark.

Fee hurdle Sharing ratio Base fee Minimum fee Maximum fee

Total expense ratio %

High Water Mark 7% (excl. VAT) 1% (excl. VAT) 1% (excl. VAT)

Uncapped, with a since inception High Water Mark. The fund's highest total TER since inception of TER was 3.55% (incl.VAT)

Performance fee example

You invest R100,000 in a fund today. The fund earns a 2% return over day 1 and the NAV at R102,000. A performance fee of 7% will be payable on the 2% gain. i.e. 0.14% (excl. Vat) Over day 2, the NAV reduces by R3,000 to R99,000. No performance fee is payable for day 2. On day 3, NAV increases to R105,000. The performance fee will be payable on the 2.94% gain (NAV of R105 000 – R102 000 the previous HWM). The performance will now be 7% of 2.94% i.e. 0.2% (excl. VAT). The NAV of R105 000 is now the new HWM.

Company details

PSG Collective Investments (RF) Limited is registered as a CIS Manager with the Financial Sector Conduct Authority, and a member of the Association of Savings and Investments South Africa (ASISA) through its holdings company PSG Konsult Limited. The management of the portfolio is delegated to PSG Asset Management (Pty) Ltd, an authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act 2002, FSP no 29524. PSG Asset Management (Pty) Ltd and PSG Collective Investments (RF) Limited are subsidiaries of PSG Konsult Limited. PSG Collective Investments (RF) Limited can be contacted on +27(21) 799 8000; (toll free) 0800 600 168, via email assetmanagement@psg.co.za

Conflict of interest disclosure

The Fund may from time to time invest in a portfolio managed by a related party. PSG Collective Investments (RF) Limited or the fund manager may negotiate a discount in fees charged by the underlying portfolio. All discounts negotiated are reinvested in the Fund for the benefit of the investors. Neither PSG Collective Investments (RF) Limited nor PSG Asset Management (Pty) Ltd retains any portion of such discount for their own accounts. The fund manager may use the brokerage services of a related party, PSG Securities Ltd.

This is the Minimum Disclosure Document (MDD) for the PSG Flexible Fund Class A.

The PSG Balanced Fund's objective is to achieve long-term growth of capital and a reasonable level of income for investors. The investment policy provides for the active management of the portfolio assets in equities, bonds, property and cash both domestically and in foreign markets. The fund can have up to 75% in equities, 25% in listed property and 45% can be invested in foreign assets and may include listed and unlisted financial instruments (derivatives). The fund operates within the constraints of Regulation 28 of the Pension Funds Act

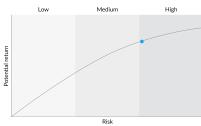

Who should consider investing?

Fund specific risks: The fund sits at the higher end of the risk/reward spectrum and investors should be comfortable with fluctuations in shares on stock markets and be prepared to accept the risk of capital loss over the shorter term. The portfolio is exposed to equity as well as default and interest rate risks. Interest rate risk is the risk that the value of fixed income investments tends to decrease when interest rates and/or inflation rises. Default risk is where the issuers of fixed income instruments may not be able to meet interest or capital repayments. Property shares may be included in the portfolio which can carry the same risk as investing directly in real estate and is subject to economic and political conditions, interest rates and tax considerations. Investing in foreign securities may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Changes in the relative values of different currencies may adversely affect the value of investments and any related income. Derivative instruments are included for efficient portfolio management purposes. The use of derivatives could increase overall risk by magnifying the effect of both gains and losses in a portfolio.

This fund is suitable for investors who:

- aim to build wealth with a balanced portfolio that diversifies the risk over the various asset classes
- are comfortable with market fluctuation risk
- willing to accept potential capital loss
- would prefer the fund manager to make the asset allocation decisions
 have an investment horizon of five years and longer

Risk/reward profile

Risk Higher risk requires a longer investment horizon

1 Year	9.36	12.41

Rolling returns (%)

The rolling return chart reflects the highest, lowest and average annualised return over the period indicated since the inception of the fund. For example, for the 1 year period the chart reflects the highest, lowest and average 12 month return the fund has experienced since its inception. Rolling returns highlight the magnitude of an investment's stronger and poorer periods of performance.

The Total Expense Ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over a one and three year period. This percentage of the average Net Asset Value (NAV) of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER ratio does not necessarily imply a poor return, nor does a low TER ratio imply a good return. The current TER cannot be regarded as an indication of future TERs. Part of the Annual Management Fee may be payable to the financial intermediary. The sum of the TER and transaction costs is shown as the Total Investment Charge. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns.

Other costs excluding transaction costs % (incl. VAT)	0.05
Transaction costs % (incl. VAT)	0.17
Total investment charge % (incl. VAT)	1.95

Transaction costs

Transaction costs are shown separately and are a necessary cost in administering the Financial Product and impacts Financial Product returns.

Transaction costs should not be considered in isolation as return may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

A schedule of fees and charges and maximum commissions is available on request from PSG Collective Investments (RF) Limited. Commission and incentives may be paid and, if so, are included in the overall costs. Different classes of participatory interest can apply to these portfolios and are subject to different fees, charges and possibly dividend withholding tax and will thus have differing performances. Adviser fees are negotiated between the client and adviser and is distinct from the other fees on this document.

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance. Fluctuations or movements in the exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The portfolio may borrow up to 10% of its market value to bridge insufficient liquidity. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds, macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate. PSG Collective Investments (RF) Limited does not provide any guarantee either with respect to the capital or the return of the portfolio. Due to rounding, numbers presented throughout this document may not add up precisely to

Regulation 28

The fund is managed according to Regulation 28 of the Pension Funds Act. The South African retirement fund industry is governed by the Pension Funds Act No. 24 of 1956. Regulation 28 of the Pension Funds Act prescribes the maximum limits in asset classes that an approved retirement fund may invest in. Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within a

All performance data for a lump sum, net of fees, include income and assumes reinvestment of income on a NAV to NAV basis. Annualised performances show longer term performance rescaled over a 12 month period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance is calculated for the portfolio and individual investor performance may differ as a result thereof. The portfolio is valued at 15h00 daily. Income distributions are net of any applicable taxes. Actual annual figures are available to the investor on request. Prices are published daily and available on the website www.psg.co.za/asset-management and in the daily newspapers. Figures quoted are from Morningstar Inc

Pricing

Forward pricing is used. Unit trust prices are calculated on a net asset value (NAV) basis, which is the market value of all assets in the portfolio including income accruals less permissible deductions divided by the number of units in issu

The ability of a portfolio to repurchase is dependent upon the liquidity of the securities and cash of the portfolio. To protect investors, a manager may suspend repurchases for a period, subject to regulatory approval, to await liquidity. A suspension ensures that the sale of a large number of units will not force PSG Collective Investments to sell the underlying investments at a price in the market which could have a negative impact on investors. PSG Collective Investments will keep all investors informed should a situation arise where such suspension is required.

This is the Minimum Disclosure Document (MDD) for the PSG Balanced Fund Class A.

The PSG Stable Fund's objective is to achieve capital appreciation and generate a performance return of CPI+3% over a rolling three-year period with low volatility and low correlation to equity markets through all market cycles. The investment policy provides for investment in a mix of debt securities, money market instruments, bonds, inflation-linked securities, listed equities and property, preference shares and other high yielding securities and derivatives. The fund may have up to 40% in equities. The fund operates within the constraints of Regulation 28 of the Pension Funds Act.

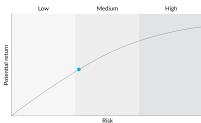

Who should consider investing?

Fund specific risks: The fund sits in the lower middle of the risk/reward spectrum and investors should be comfortable with fluctuations in markets. The risk of short-term monetary loss is low to medium. The portfolio is exposed to equity as well as default and interest rate risks. Interest rate risk is the risk that the value of fixed income investments tends to decrease when interest rates and/or inflation rises. Default risk is where the issuers of fixed income instruments may not be able to meet interest or capital repayments. Property shares may be included in the portfolio and can carry the same risk as investing directly in real estate which is subject to economic and political conditions, interest rates and tax considerations. Investing in foreign securities may be subject to risks pertaining to and tax considerations. Investing in foreign securities may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Changes in the relative values of different currencies may adversely affect the value of investments and any related income. Derivative instruments are included for efficient portfolio management purposes. The use of derivatives could increase overall risk by magnifying the effect of both gains and losses in a portfolio.

This fund is suitable for investors who:

- have a moderate risk appetite but require capital growth in real terms
 have a medium-term investment horizon of three years and longer
- are comfortable with fluctuations in markets

Risk/reward profile

Higher risk requires a longer investment horizon

This is the Minimum Disclosure Document (MDD) for the PSG Stable Fund Class A.

The PSG Diversified Income Fund's objective is to preserve capital while maximising income returns for investors. The portfolio comprises of a mix of high-yielding securities, property, bonds, preference shares and assets in liquid form (both local and foreign). The fund will optimise the asset allocation to achieve the objective over time. The equity exposure of the porfolio, excluding property shares, is limited to 10%. The portfolio may include financial instruments up to the extent and limits allowed by legislation. The fund operates within the constraints of Regulation 28 of the Pension Funds Act

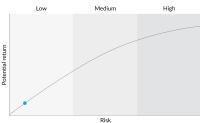

Who should consider investing?

Fund specific risks: The fund sits in the lower end of the risk/reward spectrum and investors should be comfortable with a small degree of exposure to market and interest rate fluctuations. The risk of short-term monetary loss is low but not completely eliminated. The portfolio is concentrated in bonds and cash with a small exposure to equity. The fund is primarily exposed to default and interest rate risks. Interest rate risk is the risk that the value of fixed income investments tends to decrease when interest rates and/or inflation rises. Default risk is where the issuers of fixed income instruments may not be able to meet interest or capital repayments. Property shares may be included in the portfolio and can carry the same risk as investing directly in real estate which is subject to economic and political conditions, interest rates and tax considerations. Investing in foreign securities may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

This fund is suitable for investors who:

- have a low risk appetite
- want to earn an income, but need to try and beat inflation
- have a short- to medium-term investment horizon of two years and longer

The fund is managed according to Regulation 28 of the Pension Funds Act. The South African retirement fund industry is governed by the Pension Funds Act No. 24 of 1956. Regulation 28 of the Pension Funds Act prescribes the maximum limits in asset classes that an approved retirement fund may invest in. Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within a reasonable time period.

All performance data for a lump sum, net of fees, include income and assumes reinvestment of income on a NAV to NAV basis. Annualised performances show longer term performance rescaled over a 12 month period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance is calculated for the portfolio and individual investor performance may differ as a result thereof. The portfolio is valued at 15h00 daily. Income distributions are net of any applicable taxes. Actual annual figures are available to the investor on request. Prices are published daily and available on the website www.psg.co.za/asset-management and in the daily newspapers. Figures quoted are from Morningstar Inc.

Pricing

Forward pricing is used. Unit trust prices are calculated on a net asset value (NAV) basis, which is the market value of all assets in the portfolio including income accruals less permissible deductions divided by the number of units in issue

The ability of a portfolio to repurchase is dependent upon the liquidity of the securities and cash of the portfolio. To protect

investors, a manager may suspend repurchases for a period, subject to regulatory approval, to await liquidity. A suspension ensures that the sale of a large number of units will not force PSG Collective Investments to sell the underlying investments at a price in the market which could have a negative impact on investors. PSG Collective Investments will keep all investors informed should a situation arise where such suspension is required.

The yield for the portion attributable to fixed income instruments is calculated daily on an annualised basis and is based on the historic yield of the fixed income instruments. The fund returns include returns from property and equity instruments

PSG Collective Investments (RF) Limited is registered as a CIS Manager with the Financial Sector Conduct Authority, and a member of the Association of Savings and Investments South Africa (ASISA) through its holdings company PSG Konsult Limited. The management of the portfolio is delegated to PSG Asset Management (Pty) Ltd, an authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act 2002, FSP no 29524. PSG Asset Management (Pty) Ltd and PSG Collective Investments (RF) Limited are subsidiaries of PSG Konsult Limited. PSG Collective Investments (RF) Limited can be contacted on +27(21) 799 8000; (toll free) 0800 600 168, via email assetmanagement@psg.co.za

Conflict of interest disclosure

The Fund may from time to time invest in a portfolio managed by a related party.

PSG Collective Investments (RF) Limited or the fund manager may negotiate a discount in fees charged by the underlying portfolio. All discounts negotiated are reinvested in the Fund for the benefit of the investors. Neither PSG Collective Investments (RF) Limited nor PSG Asset Management (Pty) Ltd retains any portion of such discount for their own accounts. The fund manager may use the brokerage services of a related party, PSG Securities Ltd

This is the Minimum Disclosure Document (MDD) for the PSG Diversified Income Fund Class A.

The PSG Income Fund's objective is to maximise income while achieving as much long-term capital appreciation as interest rate cycles allow. The investment policy provides for investment in assets in liquid form, a diversified range of fixed-interest securities, loan stock, debentures stock, bonds, unsecured notes, as well as other non-equity securities and financial instruments. The fund cannot invest in property, equities and preference shares.

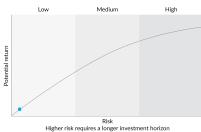

Who should consider investing?

Fund specific risks: The fund sits within the lower end of the risk/reward spectrum. Investors should be comfortable with exposure to interest rate fluctuations and market volatility. The risk of short-term monetary loss is low but not completely eliminated. The portfolio is exposed to default and interest rate risks. Interest rate risk is the risk that the value of fixed income investments tends to decrease when interest rates and/or inflation rises. Default risk is where the issuers of fixed income instruments may not be able to meet interest or capital repayments.

This fund is suitable for investors who:

- have a low risk appetite
- require an income
- have an investment horizon of one year and longer

Rolling returns (%)

The rolling return chart reflects the highest, lowest and average annualised return over the period indicated since the inception of the fund. For example, for the 1 year period the chart reflects the highest, lowest and average 12 month return the fund has experienced since its inception. Rolling returns highlight the magnitude of an investment's stronger and poorer periods of performance.

The Total Expense Ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over a one and three year period. This percentage of the average Net Asset Value (NAV) of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER ratio does not necessarily imply a poor return, nor does a low TER ratio imply a good return. The current TER cannot be regarded as an indication of future TERs. Part of the Annual Management Fee may be payable to the financial intermediary. The sum of the TER and transaction costs is shown as the Total Investment Charge. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns.

Total investment charge

Other costs excluding transaction costs % (incl. VAT)	0.02
Transaction costs % (incl. VAT)	0.13
Total investment charge % (incl. VAT)	0.90

Transaction costs

Transaction costs are shown separately and are a necessary cost in administering the Financial Product and impacts Financial Product returns.

Transaction costs should not be considered in isolation as return may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

A schedule of fees and charges and maximum commissions is available on request from PSG Collective Investments (RF) Limited. Commission and incentives may be paid and, if so, are included in the overall costs. Different classes of participatory interest can apply to these portfolios and are subject to different fees, charges and possibly dividend withholding tax and will thus have differing performances. Adviser fees are negotiated between the client and adviser and is distinct from the other fees on this document.

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance Fluctuations or movements in the exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The portfolio may borrow up to 10% of its market value to bridge insufficient liquidity. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds, macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate. PSG Collective investments (RF) Limited does not provide any guarantee either with respect to the capital or the return of the portfolio. Due to rounding, numbers presented throughout this document may not add up precisely to the totals provided.

The yield is calculated daily on an annualised basis. The calculation is based on the historic yield of fixed income instruments

All performance data for a lump sum, net of fees, include income and assumes reinvestment of income on a NAV to NAV basis. Annualised performances show longer term performance rescaled over a 12 month period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. This is the Minimum Disclosure Document (MDD) for the PSG Income Fund Class A.

The PSG Money Market Fund's objective is to provide capital security, a steady income and easy access to your money. The fund invests in selected money market instruments issued by government, parastatals, corporates and banks with a maturity term of less than 13 months. The fund operates within the constraints of Regulation 28 of the Pension Funds Act.

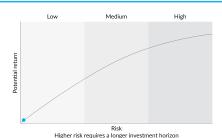

Who should consider investing?

Fund specific risks: The fund sits at the bottom of the risk/reward spectrum. A money market fund offers a secure investment, but is not completely risk free and severe losses may reduce the capital value of the portfolio. The portfolio is exposed to default and interest rate risks. Interest rate risk is the risk that the value of fixed income investments tends to decrease when interest rates and/or inflation rises. Default risk is where the issuers of fixed income instruments may not be able to meet interest or capital repayments.

This fund is suitable for investors who:

- seek capital stability, interest income and easy access to their money through a low-risk investment
- need an interim investment vehicle or 'parking bay' for surplus money
- · have a short-term investment horizon

PSG Collective Investments (RF) Limited does not provide any guarantee either with respect to the capital or the return of the portfolio. Due to rounding, numbers presented throughout this document may not add up precisely to the totals provided.

Money Market

The PSG Money Market Fund maintains a constant price and is targeted at a constant value. The quoted yield is calculated by annualizing the average 7 day yield. A money market portfolio is not a bank deposit account. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and in such circumstances a process of ring-fencing of withdrawal instructions and managed payouts over time may be followed. The total return to the investor is made up of interest received and any gain or loss made on any particular instrument. In most cases the return will merely have the effect of increasing or decreasing the daily yield but in the case of abnormal losses it can have the effect of reducing the capital value of the portfolio

The fund is managed according to Regulation 28 of the Pension Funds Act. The South African retirement fund industry is governed by the Pension Funds Act No. 24 of 1956. Regulation 28 of the Pension Funds Act prescribes the maximum limits in asset classes that an approved retirement fund may invest in. Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within a reasonable time period.

This is the Minimum Disclosure Document (MDD) for the PSG Money Market Fund Class A

31 December 2022

Investment objective (summary of investment policy)

The PSG Global Equity Feeder Fund's investment objective is to achieve capital growth over the long term with the generation of income not being the main objective of the portfolio. It is a rand-denominated equity feeder fund whose investment policy provides for it to invest solely into the PSG Global Equity Sub-Fund, a sub-fund of PSG Global Funds SICAV plc, denominated in US dollars. The underlying fund invests mainly in global listed securities and aims to reduce risk relative to its benchmark. Please refer to the Minimum Disclosure Document of the PSG Global Equity Sub-Fund for more information.

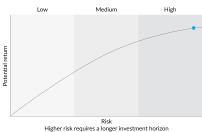

Who should consider investing?

Fund specific risks: The fund sits at the top end of the risk/reward spectrum and investors should be comfortable with fluctuations in global equity markets. The risk of short-term monetary loss is high due to volatility of exchange rates and global markets. The portfolio is exposed to equity and currency risk. Investing in foreign securities may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

This fund is suitable for investors who:

- want exposure to global equities without personally expatriating rands
 are comfortable with international equity market and currency fluctuations
 have a long-term investment horizon of seven years and longer

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance. Fluctuations or movements in the exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The portfolio may borrow up to 10% of its market value to bridge insufficient liquidity. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds, macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate. PSG Collective Investments (RF) Limited does not provide any guarantee either with respect to the capital or the return of the portfolio. Due to rounding, numbers presented throughout this document may not add up precisely to the totals provided.

Feeder Funds

A Feeder Fund is a portfolio which, apart from assets in liquid form, invests in a single portfolio of a collective investment scheme, which levies its own charges and which could result in a higher fee structure for the feeder fund.

All performance data for a lump sum, net of fees, include income and assumes reinvestment of income on a NAV to NAV basis Annualised performances show longer term performance rescaled over a 12 month period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance is calculated for the portfolio and individual investor performance may differ as a result thereof. The portfolio is valued at 15h00 daily Income distributions are net of any applicable taxes. Actual annual figures are available to the investor on request. Prices are published daily and available on the website www.psg.co.za/asset-management and in the daily newspapers. Figures quoted are from Morningstar Inc.

Pricing

Forward pricing is used. Unit trust prices are calculated on a net asset value (NAV) basis, which is the market value of all assets in the portfolio including income accruals less permissible deductions divided by the number of units in issue.

Redemptions

The ability of a portfolio to repurchase is dependent upon the liquidity of the securities and cash of the portfolio. To protect

investors, a manager may suspend repurchases for a period, subject to regulatory approval, to await liquidity. A suspension ensures that the sale of a large number of units will not force PSG Collective Investments to sell the underlying investments at a price in the market which could have a negative impact on investors. PSG Collective Investments will keep all investors informed should a situation arise where such suspension is required.

Company details

PSG Collective Investments (RF) Limited is registered as a CIS Manager with the Financial Sector Conduct Authority, and a member of the Association of Savings and Investments South Africa (ASISA) through its holdings company PSG Konsult Limited. The management of the portfolio is delegated to PSG Asset Management (Pty) Ltd, an authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act 2002, FSP no 29524. PSG Asset Management (Pty) Ltd and PSG Collective Investments (RF) Limited are subsidiaries of PSG Konsult Limited. PSG Collective Investments (RF) Limited can be contacted on +27(21) 799 8000; (toll free) 0800 600 168, via

email assetmanagement@psg.co.za

Conflict of interest disclosure

The Fund may from time to time invest in a portfolio managed by a related party. PSG Collective Investments (RF) Limited or the fund manager may negotiate a discount in fees charged by the underlying portfolio. All discounts negotiated are reinvested in the Fund for the benefit of the investors. Neither PSG Collective Investments (RF) Limited nor PSG Asset Management (Pty) Ltd retains any portion of such discount for their own accounts. The fund manager may use the brokerage services of a related party, PSG Securities Ltd.

This is the Minimum Disclosure Document (MDD) for the PSG Global Equity Feeder Fund Class A.

PSG Global Flexible Feeder Fund Class A

31 December 2022

Investment objective (summary of investment policy)

The PSG Global Flexible Feeder Fund's investment objective is to achieve superior medium-to long-term capital growth through exposure to selected sectors of the global equity market, bond market and money market. The fund is a rand-denominated feeder fund, whose investment policy provides for it to invest solely into the PSG Global Flexible Sub-Fund, a sub-fund of PSG International Funds SICAV plc. The underlying fund has a flexible sasset allocation mandate and equity exposure will be varied based on opportunity. The fund may invest up to 100% in equities, along with debt instruments or money market instruments. Please refer to the Minimum Disclosure Document of the PSG Global Flexible Sub-Fund for full information.

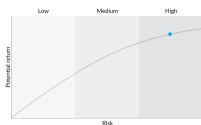

Who should consider investing?

Fund specific risks: The fund sits at the top end of the risk/reward spectrum and investors should be comfortable with fluctuations in global equity markets. The risk of short-term monetary loss is high due to volatility of exchange rates and global markets. The portfolio is exposed to equity as well as default and interest rate risks. Interest rate risk is the risk that the value of fixed income investments tends to decrease when interest rates and/or inflation rises. Default risk is where the issuers of fixed income instruments may not be able to meet interest or capital repayments. Investing in foreign securities may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

This fund is suitable for investors who:

- want exposure to global equities without personally expatriating rands
 are comfortable with international equity market and currency fluctuations
 have a long-term investment horizon of five years and longer

Risk/reward profile

Higher risk requires a longer investment horizon

PSG Global Flexible Feeder Fund Class A 31 December 2022

Rolling returns (%)

The rolling return chart reflects the highest, lowest and average annualised return over the period indicated since the inception of the fund. For example, for the 1 year period the chart reflects the highest, lowest and average 12 month return the fund has experienced since its inception. Rolling returns highlight the magnitude of an investment's stronger and poorer periods of performance.

What is a Total Expense Ratio (TER)?

The Total Expense Ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over a one and three year period. This percentage of the average Net Asset Value (NAV) of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER ratio does not necessarily imply a poor return, nor does a low TER ratio imply a good return. The current TER cannot be regarded as an indication of future TERs. Part of the Annual Management Fee may be payable to the financial intermediary. The sum of the TER and transaction costs is shown as the Total Investment Charge. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns.

Total investment charge

Total Investment Charge annualised for the period 01/01/2020 to 31/12/2022

Total expense ratio % (incl. VAT)	2.44
Annual management fee % (incl. VAT)	0.86
Other costs excluding transaction costs % (incl. VAT)	1.58
Transaction costs % (incl. VAT)	0.19
Total investment charge % (incl. VAT)	2.63

Total investment charge

Total Investment Charge annualised for the period 01/01/2022 to 31/12/2022

Total expense ratio % (incl. VAT)	2.26
Annual management fee % (incl. VAT)	0.86
Other costs excluding transaction costs % (incl. VAT)	1.40
Transaction costs % (incl. VAT)	0.13
Total investment charge % (incl. VAT)	2.39

Transaction costs

Transaction costs are shown separately and are a necessary cost in administering the Financial Product and impacts Financial Product returns.

Transaction costs should not be considered in isolation as return may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

A schedule of fees and charges and maximum commissions is available on request from PSG Collective Investments (RF) Limited. Commission and incentives may be paid and, if so, are included in the overall costs. Different classes of participatory interest can apply to these portfolios and are subject to different fees, charges and possibly dividend withholding tax and will thus have differing performances. Adviser fees are negotiated between the client and adviser and is distinct from the other fees on this document.

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance. Fluctuations or movements in the exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The portfolio may borrow up to 10% of its market value to bridge insufficient liquidity. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds, macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate. PSG Collective Investments (RF) Limited does not provide any guarantee either with respect to the capital or the return of the portfolio. Due to rounding, numbers presented throughout this document may not add up precisely to the totals provided.

Feeder Funds

A Feeder Fund is a portfolio which, apart from assets in liquid form, invests in a single portfolio of a collective investment scheme, which levies its own charges and which could result in a higher fee structure for the feeder fund.

All performance data for a lump sum, net of fees, include income and assumes reinvestment of income on a NAV to NAV basis Annualised performances show longer term performance rescaled over a 12 month period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance is calculated for the portfolio and individual investor performance may differ as a result thereof. The portfolio is valued at 15h00 daily Income distributions are net of any applicable taxes. Actual annual figures are available to the investor on request. Prices are published daily and available on the website www.psg.co.za/asset-management and in the daily newspapers. Figures quoted are from Morningstar Inc.

Pricing

Forward pricing is used. Unit trust prices are calculated on a net asset value (NAV) basis, which is the market value of all assets in the portfolio including income accruals less permissible deductions divided by the number of units in issue.
