

Investment objective (summary of investment policy)

The PSG Equity Fund's objective is to offer investors long-term capital growth without assuming a greater risk, and earn a higher rate of return than that of the South African Equity Market as presented by the FTSE/JSE All Share Index (including income). The investment policy provides for investment in a mix of securities and assets in liquid form and can include listed and unlisted financial instruments (derivatives).

Who should consider investing?

Fund specific risks: The fund sits at the top end of the risk/reward spectrum and investors should be comfortable with fluctuations in shares on stock markets and be prepared to accept the risk of capital loss. The portfolio is concentrated in local and foreign equities and therefore more volatile and exposed to market and currency risks. Property shares may be included in the portfolio and can carry the same risk as investing directly in real estate which is subject to economic and political conditions, interest rates and tax considerations. Investing in foreign securities may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

This fund is suitable for investors who:

- want an equity-focused portfolio that should produce high real returns above inflation and capital appreciation over the long term
- are comfortable with significant stock market fluctuations
- are willing to accept potential capital loss
- have a long-term investment horizon of seven years and longer

Risk/reward profile

Fund details

Annualised returns % (after fees)

As of Date: 12/31/2018

Rolling returns (%)

This chart shows you how the performance can vary over time. It is an indication of the distribution of historical rolling returns from the portfolio over each rolling 12-month period.

What is a total expense ratio?

The Total Expense Ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past three years. This percentage of the average Net Asset Value (NAV) of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER ratio does not necessarily imply a poor return, nor does a low TER ratio imply a good return. The current TER cannot be regarded as an indication of future TERs. Part of the Annual Management Fee is payable to the financial intermediary. The sum of the TER and transaction costs is shown as the Total Investment Charge. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns.

Fees

A schedule of fees and charges and maximum commissions is available on request from PSG Collective Investments (RF) Limited. Commission and incentives may be paid and, if so, are included in the overall costs. Different classes of participatory interest can apply to these portfolios and are subject to different fees, charges and possibly dividend withholding tax and will thus have differing performances. Adviser fees are negotiated between the client and adviser and is distinct from the other fees on this document.

Total investment charge

Total Investment Charge annualised for the period 1/1/2016 to 31/12/2018

Total Expense Ratio % (incl. VAT)	1.74
<i>Annual Management Fee % (incl. VAT)</i>	1.73
<i>Other costs excl. transaction costs % (incl. VAT)</i>	0.02
<i>Transaction costs % (incl. VAT)</i>	0.30
Total Investment Charge % (incl. VAT)	2.04

Transaction costs

Transaction costs are shown separately and are a necessary cost in administering the Financial Product and impacts Financial Product returns.

Transaction costs should not be considered in isolation as return may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

Disclaimer

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance. Fluctuations or movements in the exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The portfolio may borrow up to 10% of its market value to bridge insufficient liquidity. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds, macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and in such circumstances a process of ring-fencing of withdrawal instructions and managed payouts over time may be followed. PSG Collective Investments (RF) Limited does not provide any guarantee either with respect to the capital or the return of the portfolio. Due to rounding, numbers presented throughout this document may not add up precisely to the totals provided.

Performance

All performance data for a lump sum, net of fees, include income and assumes reinvestment of income on a NAV to NAV basis. Annualised performances show longer term performance rescaled over a 12 month period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance is calculated for the portfolio and individual investor performance may differ as a result thereof. The portfolio is valued at 15h00 daily. Income distributions are net of any applicable taxes. Actual annual figures are available to the investor on request. Prices are published daily and available on the website www.psg.co.za/asset-management and in the daily newspapers. Figures quoted are from Morningstar Inc.

Pricing

Forward pricing is used. Unit trust prices are calculated on a net asset value (NAV) basis, which is the market value of all assets in the portfolio including income accruals

less permissible deductions divided by the number of units in issue.

Company details

PSG Collective Investments (RF) Limited is registered as a CIS Manager with the Financial Sector Conduct Authority, and a member of the Association of Savings and Investments South Africa (ASISA) through its holdings company PSG Konsult Limited. The management of the portfolio is delegated to PSG Asset Management (Pty) Ltd, an authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act 2002, FSP no 29524. PSG Asset Management (Pty) Ltd and PSG Collective Investments (RF) Limited are subsidiaries of PSG Konsult Limited. PSG Collective Investments (RF) Limited can be contacted on +27(21) 799 8000; (toll free) 0800 600 168, via email assetmanagement@psg.co.za.

Conflict of interest disclosure

The Fund may from time to time invest in a portfolio managed by a related party. PSG Collective Investments (RF) Limited or the fund manager may negotiate a discount in fees charged by the underlying portfolio. All discounts negotiated are reinvested in the Fund for the benefit of the investors. Neither PSG Collective Investments (RF) Limited nor PSG Asset Management (Pty) Ltd retains any portion of such discount for their own accounts. The fund manager may use the brokerage services of a related party, PSG Securities Ltd.

Current context

2018 was a tough year for most investors. After a ‘Ramaphoric’ start, the JSE experienced its worst year since the global financial crisis. Market sentiment swayed as South Africa’s economic reality set in and, compounded by investor aversion towards emerging markets in general, the FTSE/JSE All Share Index ended the year 9% down in rand terms. The rand, having rallied to R11.50 against the US dollar, was trading at R14.35 at year end. Generally, developed markets also disappointed, and while the US largely managed to buck this trend, ongoing uncertainty about trade relations with China and a series of interest rate hikes by the US Federal Reserve spurred market jitters. The S&P 500 closed the year on \$2 506.85, down from \$2 673.61 on 1 January 2018, after a sharp sell-off in the final quarter.

Our perspective

While it may feel uncomfortable or even frightening, times like these – clouded by fear and uncertainty – tend to present the best investment opportunities. As Warren Buffett once said, “Every decade or so, dark clouds will fill the economic skies, and they will briefly rain gold. When downpours of that sort occur, it’s imperative that we rush outdoors carrying washtubs, not teaspoons.”

We believe that South Africa currently offers a standout investment opportunity. While rolling five-year returns of the FTSE/JSE All Share Index to December 2018 have only been poorer on four occasions over the past 40 years, three-year annualised returns following previous low points averaged around 24%. Furthermore, the domestic-facing companies our portfolios currently hold are, on average, trading at price-earnings ratios of 8 to 9 times. This has created the opportunity for strong potential returns in future.

Similarly, we continue to find value in selected global counters. While overall market valuations remain elevated when compared to history despite recent declines, there continue to be pockets characterised by fear and uncertainty. Here, low prices and low expectations have resulted in quality assets trading at wide margins of safety. A few examples include Brookfield Asset Management, Japan Post Insurance, L Brands and The Mosaic Company; companies our portfolios have held for some time and which we still believe offer attractive return prospects.

Portfolio positioning

Our preference remains for above-average quality businesses trading at wide margins of safety, and preferably on low levels of earnings. This combination increases the likelihood of favourable returns over the long run. We believe that current market conditions are likely to support above-average long-term returns.

Changes in portfolio positioning

	Q3 2018		Q4 2018
Domestic equity	66.7%	Domestic equity	72.1%
Domestic property	1.2%	Domestic property	0.0%
Domestic cash	0.5%	Domestic cash	0.5%
Foreign equity	29.2%	Foreign equity	25.5%
Foreign property	2.2%	Foreign property	1.8%
Foreign cash	0.2%	Foreign cash	0.1%

There may be slight differences in the totals due to rounding.

All data as per Bloomberg to 31 December 2018.
