FUND CHARACTERISTICS

This fund invests in equities and can be up to 25% in foreign companies, with the balance in companies listed in South Africa. This fund should produce the highest real (above inflation) returns over the long-term. The fund sits at the top end of the risk/return spectrum and investors in this fund should be comfortable with stock market fluctuations and should have an investment horizon of at least five years.

RISK CLASSIFICATION

The PSG Equity Fund Class A has a Total Expense Ratio (TER) as listed above. For the period from 1 July 2014 to 30 June 2015 on an annualised basis, the above percentages of the average Net Asset Value of the portfolio was incurred as charges, levies and fees.

INVESTMENT OBJECTIVE

The fund is a general equity fund and the manager in selecting securities for the portfolio, will seek to offer investors long-term capital growth and earn a higher rate of return than that of the South African equity market as represented by the All Share Index including income, without assuming a greater risk.

INVESTMENT POLICY

In order to achieve these main objectives the investments to be acquired for the PSG Equity Fund shall comprise a mix of securities and assets in liquid form, all to be acquired at a fair market value. The portfolio will hold a minimum of 75% of the market value of the portfolio in equities at all times.

Who should invest in the PSG Equity Fund?

The fund is suitable for investors who:

- seek an equity-focused portfolio that has outstanding growth potential
- aim to maximise potential returns within an acceptable risk profile
- focus on a long-term investment horizon

General information and risks

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance. Fluctuations or movements in the exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and script lending. The Fund may borrow up to 10% of its market value to bridge insufficient liquidity. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds; macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and in such circumstances a process of ring-fencing of withdrawal instructions and managed payouts over time may be followed. PSG Collective Investments Limited does not provide any guarantee either with respect to the capital or the return of the portfolio.

Performance

All performance data for a lump sum, net of fees, include income and assumes reinvestment of income on a NAV to NAV basis. Annualised performances show longer term performance rescaled over a 12 month period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance is calculated for the portfolio and individual investor performance may differ as a result thereof. The portfolio is valued at 15h00 daily. Income distributions are net of any applicable taxes. Actual annual figures are available to the investor on request. Prices are published daily and available on the website www.psg.co.za/asset-management and in the daily newspapers. Figures quoted are from Morningstar Inc.

Pricing

Forward pricing is used. Unit trust prices are calculated on a net asset value (NAV) basis, which is the market value of all assets in the Fund including income accruals less permissible deductions divided by the number of units in issue.

Fees

A schedule of fees and charges and maximum commissions is available on request from PSG Collective Investments Limited. Commission and incentives may be paid and, if so, are included in the overall costs. Different classes of Participatory Interest can apply to these portfolios and are subject to different fees, charges and possibly dividend withholding tax and will thus have differing performances.

Total Expense Ratio Disclosure

The TER is the percentage of the Fund's average assets under management that have been used to pay the Fund's operating expenses over the period as indicated on page 1. The TER includes the annual management fees that have been charged, trading costs, VAT and other expenses. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

Cut-off times

The cut-off time for submitting investment transactions is 14h30 daily, with the exception of the PSG Money Market Fund which is 11h00.

Company details

PSG Collective Investments Limited is registered as a CIS Manager with the Financial Services Board, and a member of the Association of Savings and Investments South Africa (ASISA) through its holdings company PSG Konsult Limited. The management of the portfolio is delegated to PSG Asset Management (Pty) Ltd, an authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act 2002, FSP no 29524. Who should invest in the PSG Diversified Income Fund?

The fund is suitable for investors who:

- have a low risk appetite and with an income requirement
- want to earn an income, but need to try and beat inflation
- focus on a short- to medium-term investment horizon

Diversified Income

The yield is calculated daily on an annualised basis. The calculation is based on the current yield of fixed income instruments.

General information and risks

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance. Fluctuations or movements in the exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and script lending. The Fund may borrow up to 10% of its market value to bridge insufficient liquidity. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds; macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and in such circumstances a process of ring-fencing of withdrawal instructions and managed payouts over time may be followed. PSG Collective Investments Limited does not provide any guarantee either with respect to the capital or the return of the portfolio.

Regulation 28

The fund is managed according to Regulation 28 of the Pension Funds Act. The South African retirement fund industry is governed by the Pension Funds Act No. 24 of 1956. Regulation 28 of the Pension Funds Act prescribes the maximum limits in asset classes that an approved retirement fund may invest in. Exposures in excess of the limits will be corrected immediately, except where due to a change in the fair value or characteristic of an asset, e.g. market value fluctuations, in which case they will be corrected within a reasonable time period.

Performance

All performance data for a lump sum, net of fees, include income and assumes reinvestment of income on a NAV to NAV basis. Annualised performances show longer term performance rescaled over a 12 month period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance is calculated for the portfolio and individual investor performance may differ as a result thereof. The portfolio is valued at 15h00 daily. Income distributions are net of any applicable taxes. Actual annual figures are available to the investor on request. Prices are published daily and available on the website www.psg.co.za/asset-management and in the daily newspapers. Figures quoted are from Morningstar Inc.

Pricing

Forward pricing is used. Unit trust prices are calculated on a net asset value (NAV) basis, which is the market value of all assets in the Fund including income accruals less permissible deductions divided by the number of units in issue.

Fees

A schedule of fees and charges and maximum commissions is available on request from PSG Collective Investments Limited. Commission and incentives may be paid and, if so, are included in the overall costs. Different classes of Participatory Interest can apply to these portfolios and are subject to different fees, charges and possibly dividend withholding tax and will thus have differing performances.

Total Expense Ratio Disclosure

The TER is the percentage of the Fund's average assets under management that have been used to pay the Fund's operating expenses over the period as indicated on page 1. The TER includes the annual management fees that have been charged, trading costs, VAT and other expenses. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

FUND CHARACTERISTICS

This fund invests in interest-bearing instruments with a maturity of less than 13 months. These are cash deposits and highly liquid fixed interest securities. The fund aims to preserve capital and provide a steady income yield with high liquidity. Investors in this fund should experience no market fluctuations, wish to ensure that their capital remains intact over even the shortest term and there is no suggested minimum period.

RISK CLASSIFICATION

INVESTMENT OBJECTIVE

The fund aims to provide capital security, a steady income yield and high liquidity.

INVESTMENT POLICY

The investment objective of the portfolio is to provide a medium whereby investors can obtain undivided participation in a diversified portfolio of such money market instruments as defined from time to time. The primary performance objective of the portfolio is to obtain as high a level of current income as is consistent with capital preservation and liquidity. Capital gains will be of an incidental nature. The portfolio will comply with legislation governing retirement funding.

Who should invest in the PSG Money Market Fund?

The fund is suitable for investors who:

- seek capital stability, interest income and high liquidity through a low-risk investment
- need an interim investment vehicle or 'parking bay' for surplus funds
- focus on a short- to medium-term investment horizon

Money Market

The PSG Money Market Fund maintains a constant price and is targeted at a constant value. The quoted yield is calculated by annualizing the average 7 day yield. A money market portfolio is not a bank deposit account. The total return to the investor is made up of interest received and any gain or loss made on any particular instrument. In most cases the return will merely have the effect of increasing or decreasing the daily yield but in the case of abnormal losses it can have the effect of reducing the capital value of the portfolio.

General information and risks

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance. Who should invest in the PSG Global Equity Feeder Fund?

The fund is suitable for investors who:

- seek an equity-focused portfolio that has outstanding growth potential
- aim to maximise potential returns within a moderate risk investment
- focus on a long-term investment horizon

Feeder Fund

A Feeder Fund is a portfolio which, apart from assets in liquid form, invests in a single portfolio of a collective investment scheme, which levies its own charges and which could result in a higher fee structure for the feeder fund.

General information and risks

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance. Fluctuations or movements in the exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and script lending. The Fund may borrow up to 10% of its market value to bridge insufficient liquidity. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds; macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and in such circumstances a process of ring-fencing of withdrawal instructions and managed payouts over time may be followed. PSG Collective Investments Limited does not provide any guarantee either with respect to the capital or the return of the portfolio.

Performance

All performance data for a lump sum, net of fees, include income and assumes reinvestment of income on a NAV to NAV basis. Annualised performances show longer term performance rescaled over a 12 month period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance is calculated for the portfolio and individual investor performance may differ as a result thereof. The portfolio is valued at 15h00 daily. Income distributions are net of any applicable taxes. Actual annual figures are available to the investor on request. Prices are published daily and available on the website www.psg.co.za/asset-management and in the daily newspapers. Figures quoted are from Morningstar Inc.

Pricing

Forward pricing is used. Unit trust prices are calculated on a net asset value (NAV) basis, which is the market value of all assets in the Fund including income accruals less permissible deductions divided by the number of units in issue.

Fees

A schedule of fees and charges and maximum commissions is available on request from PSG Collective Investments Limited. Commission and incentives may be paid and, if so, are included in the overall costs. Different classes of Participatory Interest can apply to these portfolios and are subject to different fees, charges and possibly dividend withholding tax and will thus have differing performances.

Total Expense Ratio Disclosure

The TER is the percentage of the Fund's average assets under management that have been used to pay the Fund's operating expenses over the period as indicated on page 1. The TER includes the annual management fees that have been charged, trading costs, VAT and other expenses. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

Cut-off times

The cut-off time for submitting investment transactions is 14h30 daily, with the exception of the PSG Money Market Fund which is 11h00.

Who should invest in the PSG Global Flexible Feeder Fund?

The fund is suitable for investors who:

- want a managed solution in offshore markets
- want to diversify their holdings across the world
- focus on a medium- to long-term investment horizon

Feeder Fund

A Feeder Fund is a portfolio which, apart from assets in liquid form, invests in a single portfolio of a collective investment scheme, which levies its own charges and which could result in a higher fee structure for the feeder fund.

General information and risks

Collective Investment Schemes in Securities (CIS) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up and past performance is not a guide to future performance. Fluctuations or movements in the exchange rates may cause the value of underlying international investments to go up or down. CIS are traded at ruling prices and can engage in borrowing and script lending. The Fund may borrow up to 10% of its market value to bridge insufficient liquidity. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds; macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information.
