GLOSSARY

Longevity risk: The risk that an individual will outlive his/her savings because the long term investment growth was insufficient to sustain the individuals' life expenses.

Inflation risk: The risk that long term inflation growth will exceed the long term investment growth of an individuals' portfolio, thereby effectively reducing the purchasing power of those savings.

***Rolling Returns:** The graph illustrates the best, worst and average rolling returns over the indicated periods, since the inception of the fund. This provides investors with an indication of the distribution of returns historically experienced by this fund. For example, the chart depicts the highest and lowest consecutive 12-month returns since inception, this is a measure of how much the Fund has varied per rolling 12-month period.

NOTES AND DISCLAIMER

The Total Expense Ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past three years. This percentage of the average Net Asset Value (NAV) of the portfolio was incurred as charges, levies and fees related to the management of the portfolio. A higher TER ratio does not necessarily imply a poor return, nor does a low TER ratio imply a good return. The current TER cannot be regarded as an indication of future TERs. Part of the Annual Management Fee is payable to the financial intermediary. **Transactions costs:** Transactions Costs are shown separately. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. They should not be considered in isolation as return may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER. **Total Investment Charge:** The sum of the TER and Transaction Costs is shown as the Total Investment Charge. Since Fund returns are quoted after the deduction of these expenses, the TER and Transactions Costs should not be deducted again from published returns. Due to rounding, numbers presented throughout this document may not add up precisely to the totals provided.

NOTES AND DISCLAIMER

Disclaimer: Collective Investment Schemes in Securities (Unit trusts) are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up and past performance is not a guide to future performance. Collective Investment Schemes are traded at ruling prices and can engage in borrowing and scrip lending. Where foreign securities are included in a portfolio, the portfolio is exposed to risks such as potential constraints on liquidity and the repatriation of funds, macroeconomic, political, foreign exchange, tax, settlement and potential limitations on the availability of market information. Income distributions is net of any applicable taxes. The fund may borrow up to 10% of the market value to bridge insufficient liquidity. Excessive withdrawals from the fund may place the fund under liquidity pressure and, in certain circumstances a process of ring-fencing withdrawal instructions may be followed.

Fund of Funds (FOF): A fund of funds portfolio invests in portfolios of Collective Investment schemes, which levy their own charges, which could result in a higher fee structure for the fund of funds. A schedule of actual annual fees and charges, maximum commissions as well as actual performance figures can be requested from PSG Collective Investments (RF) Limited. Commission and incentives may be paid and if so, are included in the overall costs. The portfolios may be capped at any time in order for them to be managed in accordance with their mandate. Different classes of participatory interests (units) can apply to these portfolios and are subject to different fees and charges. Forward pricing is used.

Source of performance: Figures quoted are from Morningstar Inc.

Cut-off times: Transaction cut-off time is 14H30 daily.

Performance: Unit prices are calculated on net asset value (NAV) basis, which is the market value of all assets in the fund including income accruals and permissible deductions divided by the number of units in issue. Prices are published daily and are available on the website www.psg.co.za and in the daily newspapers. Performance is calculated for the portfolio and individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All performance data is for a lump sum, net of fees, include income distributions, prior to deduction of applicable taxes, and assumes reinvestment of income distributions on a NAV to NAV basis. The portfolio is valued at 3pm daily. Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Additional information is available free of charge on the website and may include publications, brochures, application forms and annual reports or please contact PSG Client Services on 0800 600 168 or email: assetmanagement@psg.co.za.
